New VARIO - Welding option

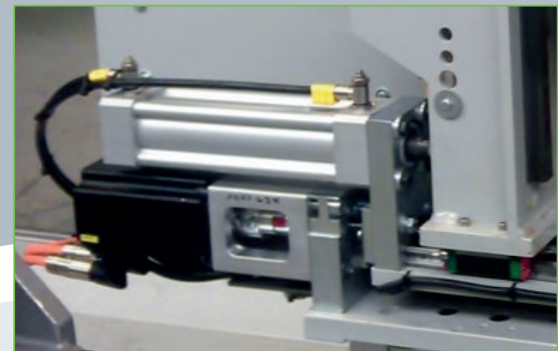

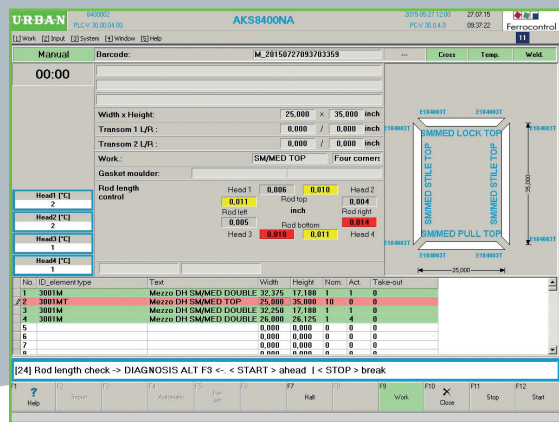

Available on High Performance 4 point Welding Machines

Vertical AKS 8400NA or Horizontal AKS 6600NA

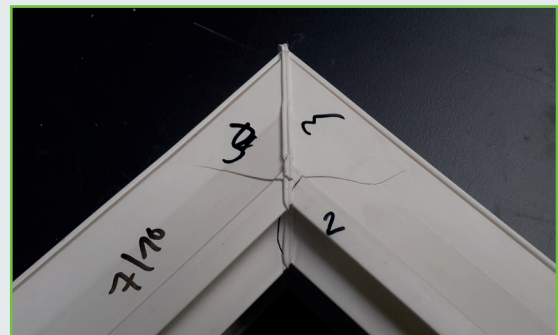

High Performance - High Speed - High Temperature

- New URBAN high-end welder option "VARIO" is available on 4 point vertical or horizontal welding machines.
- VARIO equals increased output over traditional welding machines.
- Welding heads provided with 8 servo drives allowing axially adjustable table movements.
- Feedback and Log files of all parameters recorded for each weld cycle. Reports on estimated window quality available from database.

- Welding parameters can be entered for each single profile.

- All critical movements controlled by servo drive. Resulting in adjustable table movement parameters. Some of which are: welding pressure, burn off, table synchronization, Joining pressure & final pinch.

- High speed on all technical movements. In addition, welding on traditional heat plates with temperatures up to 290°C (554°F)

- Innovative software controlled electronic positioning of all 8 welding tables increasing corner strength.
